

Experts and Specialists in Escalator Cleaning Machines...

Ask Yourself...

- Are you adapting your machine, cleaning offsite or manually cleaning the escalator step risers?
- Are your escalators hygienically clean?
- Does the appearance of your escalators add value to your business?
- What are the cross contamination risks?
- What damage is caused to your escalators by the grinding paste of dirt and grease build-up?
- Can you afford to replace your escalators?
- Are your maintenance costs controlled?
- Do you have a value added maintenance programme in place?
- When were your escalators last deep cleaned?
- Can your escalators be cleaned overnight without down time and traffic flow disruption?

There is only one solution...The Rotomac ET15B!

The first Escalator deep cleaning machine in the world, that automatically deep cleans the vertical and horizontal part of an escalator step, simultaneously, bringing your escalator back to an 'as new' appearance! There is only one solution...

Features & Benefits

- Dramatic cost savings compared to conventional cleaning methods.
- With the new T10 attachment, now no need for x2 machines!
- Battery backup should the site have a power cut, the machine can be safely removed from the escalator!
- 15 rotating brushes ensure a thorough deep clean.
- No need to remove the steps, cleaning done in-situ.
- Overnight cleaning ensuring the escalator is ready for traffic at the start of the day.
- The step and riser of the escalator are cleaned right to the edges.
- Efficient and effective removal of grease, spillage's, stones, foreign objects, hardened sand and grinding paste (spillage combined with grease etc.).
- Thoroughly deep cleaned escalators.
- No damage to escalators.
- No damage to electrical circuits and internal mechanisms.
- Controlled preset chemical and minimal water is sprayed through nozzles.
- Will not dilute the lubrication of the escalator mechanism.
- Immediate vacuuming of the dirty solution into holding tanks.
- Eliminates the danger of chains rusting, motors burning out, and damage to electrical circuits of the escalators.
- Decreases escalator maintenance costs.
- Tested and officially endorsed by the world's leading manufacturers.
- The system is more efficient and cost effective than other methods.
- Premises with clean escalators are more appealing, therefore attract more trade and develop a better reputation. Offering you peace of mind.

Our Customers opinions...

'I have been involved at senior management level with the cleaning operation in Heathrow for the last 6 years. I am more than happy to confirm that the machines provided by **Rosemor** are manufactured to the highest standard with comprehensive training being received from **Rosemor** technical team. These machines have delivered on a continuous basis the required and sometimes above standard of clean required by the BAA organisation.' **Sean, Contracts Management Team BAA Airports Limited**

'The Rotomac Escalator Cleaning Machine has been a very effective and efficient in cleaning the Otis Ltd Escalators here at Chapelfield over the last four plus years, proving reliable and compatible with the Otis Ltd escalators. We are readily recommending the Rotomac and the Service Maintenance provide by Rosemor Ltd in cleaning Otis Ltd Escalators.'

**Greg Rice, Service Delivery Manager
Chapelfield Shopping Centre, Norwich**

Time is money.... Speed is of the essence...

The T10 and T10I deep cleans in minutes with no operator!

At last a travelator / escalator cleaning machine that deep cleans in only minutes. The T10 deep cleans and dries travelator or escalator steps to a dazzling refurbished appearance, simply attaching onto the Rotomac ET15B, using its tanks and power supply. The T10 quickly removes years of heavy dirt and grime, leaving the surfaces gleaming like new!

The T10I operates independently by simply connecting to the mains deep cleaning on a moving escalator or travelator. The machine starts by simply pressing one button, then this machine then can be left to deep clean in minutes! It's as simple as that!

Ten counter rotating brushes reach deep into the grooves achieving results never before realised in this field. A powerful vortex recovery system provides the suction leaving the surface 100% dry and ready for immediate use. As a result of this machine's speed and high performance, there is no longer a need to clean out of hours, or close escalators or travelator for long periods of time. Should a spillage occur, this machine is quick to maintain the image your company aims to preserve!

INVESTOR IN PEOPLE

Rosemor Cares More!

The ET15B, T10 and T10I have been built, designed and manufactured to the highest standards by aircraft engineers using the highest quality materials.

Rosemor's machines are being used in airports, railways stations, Metro stations, stores, shopping centres and many other locations worldwide. Rosemor's reputation for supplying all major airports in the UK, Escalator and Travellator manufacturers, major Cleaning Contractors such as ISS, OCS, Mitie, Amey etc has enabled them to expand not only nationwide, but also globally.

It is of utmost importance to Rosemor that their customers use their machine safely to achieve optimum results with minimum expense. Therefore, full and extensive training courses are offered to ensure the operators are confident and that maximum results are achieved. Trainers from Rosemor have travelled worldwide, to carry out practical training; teaching Operators, Distributors, Managers and Engineers not only how to use the machine but also how to maintain it independently. Rosemor also offers refresher courses to ensure new and existing employees share the same knowledge. Rosemor considers communication key to its success with their customers. Knowledge and experiences are constantly shared to ensure their customer needs are fulfilled.
